HPC Advisory Council Best Practices. The HPC-AI Advisory Council provides best practices, that through experience and research, have shown to improve clustering and applications productivity.

HPC Advisory Council - Best Practices

In physics, screening is the damping of electric fields caused by the presence of mobile charge carriers. It is an important part of the behavior of charge-carrying fluids, such as ionized gases (classical plasmas), electrolytes, and charge carriers in electronic conductors (semiconductors, metals).

Electric-field screening - Wikipedia

A basis set in theoretical and computational chemistry is a set of functions (called basis functions) that is used to represent the electronic wave function in the Hartree-Fock method or density-functional theory in order to turn the partial differential equations of the model into algebraic equations suitable for efficient implementation on ...

Basis set (chemistry) - Wikipedia

Hi Saman. The HPmodes option only uses the high precision format (to five figures) vibrational frequency eigenvectors in the frequency output in addition to the normal three-figure output.
